Interests: Technology, Artificial Intelligence, Photography, Sports, Traveling, Fashion, and Sustainability

PORTFOLIO

- OpenSponsorship Data Analytics Challenge:** [Tools: Python • Pandas • Matplotlib • Seaborn] 10 Hours
- **Brand Engagement Deep Dive:** Leveraged data visualization to identify 'Brand' as the dominant role. Suggest exclusive content and promotions to boost retention at Plan Level 0.
 - **Campaign Onboarding Analysis:** Analyzed brand behavior, revealing a 54-day average to launch campaigns. Recommend process optimizations for quicker onboarding.
 - **User Search Behavior Insights:** Used statistical analysis to detect search behavior contrasts between Plan Levels 0 and 3. Propose tailored real-time alerts based on these patterns.
- Stock Price Pipeline and Visualization for E-Commerce:** [Tool: AWS • Python] 10 hours
- Monitored giants like Amazon, Alibaba; spotlighted Costco's volatility, advising on market shifts and investment strategies.
 - Built a real-time data pipeline with AWS, tracking stocks across 10 e-commerce platforms.
 - Leveraged AWS Athena & Glue for data extraction, visualizing market dynamics for informed planning.
- NYC Subway Crime Analysis:** [Tools: Tableau • Python • Alteryx] 16 hours
- Advised resource allocation for safety, emphasizing stations needing enhanced security based on crime trends.
 - Analyzed 63,505 crimes, identifying Manhattan and specific outlying stations as top concerns.
 - Used a color-coded map to highlight crime hotspots, peak times, and vulnerable stations like the 125th.
- Five-year Performance Analysis of MSFT:** [Tools: Python • Excel] 11 hours
- Analyzed MSFT over five years, finding a strong correlation with the S&P500's market trends.
 - Suggested to stakeholders that MSFT's trends can offer a snapshot of the broader market, aiding in informed decisions.
 - Employed Python and Excel for data extraction, visualizing the close MSFT - S&P500 relationship.

EXPERIENCES

- Watchfinder&Co** | New York, NY | **Operation Analyst** 12/21 - 12/22
- Inspected and analyzed data for 50 watches weekly, aiding in achieving annual sales and purchasing targets.
 - Processed 20 manifests daily and reduced stock discrepancies by 10% by utilizing data analysis and inventory management.
- Yigal Azrouel** | New York, NY | **Merchandising & Marketing Coordinator** 01/20 - 06/20
- Assisted in sales meetings, effectively communicating data-driven insights to buyers.
 - Conducted market research to identify fashion trends and supported data-driven event planning and promotions.
